Dear Reader,

I have been a long-standing advocate for the success of Adder Mobile Technologies, Inc. As one of the original co-founders, executive officers, and board members of the company, I hold a unique perspective of the company's development that stems from its inception to its present position. As such, when I was offered a return to service on Adder Mobile's board of directors I did not hesitate to step up.

In addition to this unique perspective, I will bring new experiences and skills acquired under my tenure as the director of Henderson Entrepreneur And Technology Lab. This entails a suite of experience in government relations, grant proposals & administration, and more specifically, SBIR development.

I am honored to add these experiences to Adder Mobile's board of directors and actively return to the advancement of this venture.

Thank you,

CT
